CA12CD-S PTT ADAPTER

Meets the Needs of Mission Critical Applications

The CA12CD-S is a cordless PTT (push-to-talk) headset adapter designed to provide wireless communications and PTT functionality for applications such as Public Safety Dispatch and Air Traffic Control. The CA12CD-S is supplied with the analog Console Interface Cable (PJ-7) as shown. For digital applications, Model SSP 2468-01 (sold separately) can be installed. This USB-PTT Adapter Cable replaces the Console Interface Cable and provides a complete digital solution. The CA12CD-S uses digital processing (DECT™ 6.0), and operates in the UPCS band (1.92 – 1.93 GHz) in North America. European versions are also available that operate within the DECT frequency range (1.88 – 1.90 GHz). Various connector options available upon request.

CA12CD-S KEY COMPONENTS

### BASE UNIT:
- Two charging wells (unit supplied with an extra battery)
- Sending and receiving sensitivity controls
- Status LEDs for Power, Battery Charging and PTT
- Coil cord (10 ft. extended) with PJ-7 connector
- Battery recharge time: 1 hour (90%); 3 hours (100%)
- Operating temp. range: +4°C (40°F) to +49°C (110°F)

### REMOTE UNIT:
- PTT button with momentary/locking selector
- On-Off button with LED
- Robust metal belt clip
- Receiving volume control
- 12 inch cable with Quick Disconnect
- Accepts all Plantronics “H” and “HW” Tops

GLOBAL SERVICE AND SUPPORT
Backed by Plantronics industry leading global service and support.
+1-800-544-4660 (US and Canada)
+1-831-458-7700 (outside US)

APPLICATIONS:
- Public Safety
- Air Traffic Control
- Radio Dispatch Facilities
- Training/Simulation

Cordless Push-to-Talk
