GET STARTED

MARQUE A170™

Designed in Santa Cruz, California

GET PAIRED

The first time you switch on your headset it begins the pairing process.

- 1 While the headset indicator light  flashes red and white, activate Bluetooth® on your iPhone and set it to search for new devices.

iPhone*

Settings > General > Bluetooth > On
Starts the search for devices.

* Menus may vary by device.

- 2 Select "PLT_A170."
- 3 Once successfully paired, the indicator light  stops flashing red and white and you hear "pairing successful."

TAKE CONTROL

Answer a call

Choose:

- Say “answer” after call is announced, or
- Tap the Call Control button ☎

End a call

Tap the Call Control button ☎ to end current call.

Reject a call

Choose:

- Say “ignore” after call is announced, or
- Press Call Control button ☎ for 2 seconds

Adjust the volume

Tap the Volume/Mute button 🔊/🔇 to cycle through preset levels.

Mute headset

During a conversation, press and hold the Volume/Mute button 🔊/🔇 until you hear “mute on” or “mute off.” While the microphone is muted, an alert repeats every 15 minutes.

Call back last call

To call your last number dialed, double tap the Call Control button ☎.

Use call waiting

Double tap the Call Control button ☎ to place a current call on hold and answer a new call from the same iPhone. Double tap the Call Control button ☎ again to switch between calls. Call waiting does not work between two paired iPhones (see Use Two Phones).

Use voice dialing

Press the Call Control button ☎ for 2 seconds, wait for audible prompt depending on your iPhone and then tell the iPhone to dial the name of a stored contact.

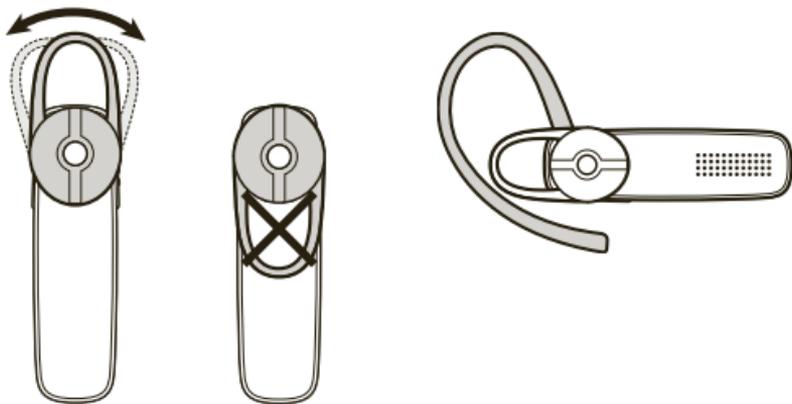

CHARGE IT

Your new headset has enough power to pair and make a few calls. It takes two hours to fully charge the headset; the indicator light  turns off once charging is complete.

ADJUST THE FIT

The universal-fit eartip has a thin loop that bends to gently tuck into the contours of either ear. To adjust the fit, you can rotate the eartip on the headset or add the optional clip-on earloop.

STREAM AUDIO

Streaming audio is controlled using your iPhone, but when a call rings, the audio automatically pauses to allow you to answer or ignore the call. Once the call is ignored or ends, the streaming audio is resumed.

SAVE POWER

If you leave your headset powered on but out of range of your paired iPhone for more than 90 minutes, your headset will conserve its battery power by entering into a DeepSleep™ mode.

Once back in range with your iPhone, tap the Call Control button  to exit DeepSleep mode. If your iPhone is also ringing, tap the Call Control button  again to answer your call.

DECIPHER THE LIGHTS

Your headset has an indicator light  that flashes in response to a change in status or after a button press.

Some examples of what you will see are:

- Solid red until charging complete and then off
- Flashing red and white during pairing
- Triple red flash when <10 minutes of talk time
- Triple white flash at incoming call

HEAR IT WHISPER

Your headset tells you about status changes in English. For example:

“Power on”

“Pairing successful”

“Talk time (x) hours”

“Mute on”

“Lost connection”

“Recharge headset”

USE TWO PHONES

Multipoint technology lets you pair a second phone and answer calls from either phone.

- 1 Power on your headset.
- 2 Press and hold the Call Control button  until the indicator light  flashes red and white or you hear "pairing."
- 3 While the indicator light  flashes red and white, activate Bluetooth on your phone and set it to search for new devices.
- 4 Select "PLT_A170."

Once successfully paired, the indicator light stops flashing and you hear "pairing successful."

DISABLE VOICE COMMANDS

This headset only speaks and understands English. If you prefer to use the Call Control button  to answer or reject calls, you can disable the voice commands "answer" or "ignore."

With the headset powered on, simultaneously press the Call Control  and Volume  buttons until you see the indicator light flash white two times. Repeat these steps to reactivate the commands.
