Electronic Hook Switch Guide
Electronic Hook Switch Guide Contents

Electronic Hook Switch Cables (EHS) provide remote desk phone call control (answer/end) with your Plantronics wireless headset system (or the MDA200 headset hub).

We offer cables that are compatible with many of the most popular office desk phones.

We also have a handset lifter accessory that can be used with most desk phones that are not compatible with one of our EHS cables. Visit plantronics.com for more information.
Electronic Hook Switch Adapter for Apple iPhones

**EHS Setup**
Use the EHS setup below to automatically answer a mobile phone call by pressing a button on your CS500 Series headset.

Electronic Hook Switch for Alcatel-Lucent Enterprise

**EHS Setup**

Use the EHS setup below to automatically answer a desk phone call by pressing a button on your Savi 700 Series or CS500 Series headset or MDA200 or Voyager Legend CS.

### ALCATEL-LUCENT ENTERPRISE MODELS: 8082 My IC Phone

**SETUP**

1. Connect the EHS cable to the desk phone.
2. Connect the Savi 700 Series or CS500 Series headset or MDA200 or Voyager Legend CS to the EHS cable.
3. Press the button on the headset to answer the call.

### ALCATEL-LUCENT ENTERPRISE MODELS: 8012, IP 8038, IP 8068, TDM 8029, TDM 8039

**SETUP - 8012**

1. Connect the EHS cable to the desk phone.
2. Connect the MDA200 to the EHS cable.
3. Press the button on the MDA200 to answer the call.

**SETUP - IP 8028, IP 8038, IP 8068**

1. Connect the EHS cable to the desk phone.
2. Connect the CS500/CS500 XD, Voyager Legend CS to the EHS cable.
3. Press the button on the headset to answer the call.

**SETUP - TDM 8029, TDM 8039**

1. Connect the EHS cable to the desk phone.
2. Connect the CS500/CS500 XD, Voyager Legend CS to the EHS cable.
3. Press the button on the headset to answer the call.

Flap

Cable A

Install the ringer detect device on the phone over the speaker, under the handset. This is then plugged into the socket mounted midway along the audio cable. Supports only DT700/300 Series. Please contact NEC for more information.

Note: Disconnect the phone from the network cable prior to installing the EHS cable. Insert cable “A” per diagram, and install the plastic flap included with the APN-91 cable, per the diagram prior to reconnecting the network connection. Please wait 20-30 seconds after all connections are made before pressing the headset button to make a call. Please contact NEC for more information.

*The NEC DT Series phones come in 2 versions, the std SIP (used with NEC product SIP@NET and 3C) and the i-SIP/N-SIP versions which are used with the SV8100, SV8300 and SV8500. The APN-91 only works with the i-SIP/N-SIP versions of the DT700 terminals.

For phone set-up, please refer to your specific phone manufacturer’s instructions.
