- Charging (solid red until charged)
- Very low battery (3 red flashes at powering on)
- Pairing mode (repeating red/white flashes)

MICRO USB CHARGING PORT
- Use with an AC wall charger:
  1 hour before first use
  2 hours (full charge)
- Do not use headset while charging

Your headset may look slightly different than the illustration, but will still work as described.

Be safe! Please read the safety guide for important safety, charging, battery and regulatory information before using your new headset.
“Pairing” is the set-up process of introducing your headset to your phone. Before using your headset for the first time, you must pair it with your Bluetooth-enabled phone. “Multipoint” lets you pair this headset with two phones so you can answer a call from either phone.

1. READY
First time, right out of the box:
Slide the power switch to turn the headset on. The LED flashes red/white to indicate pairing mode.
Pair new or second phone:
Turn on headset. Press Call button until the LED flashes red/white for pairing mode.

2. SET
Activate the Bluetooth feature on your phone, then use phone menus to “add,” “search” or “scan” new Bluetooth devices.
Phones have different menus to select from, for example:
iPhone: Settings > General > Bluetooth > On (starts the search for devices)
BlackBerry® smartphone: Settings/options > Bluetooth: On > Search for devices
Android™: Settings > Wireless & Networks > Bluetooth: On > Scan for devices.

3. CONNECT
Select “PLT_M25-M29” or “PLT_M55” from the list of Bluetooth devices shown on your phone.
If phone asks for a passcode, enter four zeros (0000). You may see **** on screen.
Some phones also ask to confirm headset connection after pairing.
Headset LED will stop flashing red/white once successfully paired/connected.
You can now make a call using your phone’s keypad or voice-dialing feature.
TRY IT ON

The loop of the gel eartip tucks into the back curve of your ear for a stable fit.

Try on the headset. The eartip is positioned to suit most people, but you may want to rotate it to best fit your left or right ear.

The gel eartip clicks into grooves on the speaker, so that the eartip doesn’t move out of place during use.

For best voice pickup, always check that the headset points towards the corner of your mouth.
Stay near your phone
Bluetooth has a working “range” of up to 10 meters (33 feet) between the phone and headset before audio degrades and the connection is lost.

Try DeepSleep™
If you leave your headset powered on but out of range from your paired phone for more than 90 minutes, your headset will conserve its battery power by entering into DeepSleep mode. This power-saving mode keeps your headset charged for up to 5 months so it’s ready when you need it.

Once back in range with your phone, tap the Call button to exit DeepSleep mode. If your phone is also ringing, tap the Call button again to answer your call.

Know how to reconnect
Your headset tries to reconnect a lost connection. If it can’t, then tap the Call button once or manually reconnect via the phone’s Bluetooth device menu.

If your headset remains out of range for more than 90 minutes, the DeepSleep mode will activate.

Turn off voice commands (M55 only)
When prompted by the headset, you can just say “answer” or “ignore” to incoming calls – no need to press any buttons.

If you prefer not to use the voice command feature, you can disable it and just use the Call button.

To disable: with the headset powered on, simultaneously press the Call button and Volume button until you see the white LED flash twice.

To reactivate the feature: just repeat the steps and you will again see the white LED flash twice.

*Voice commands are only available in English.

Use an iPhone to check headset battery
An icon representing the battery level of your headset is automatically displayed on-screen beside the phone’s battery level icon.

Listen to music and more
If your phone also has the Bluetooth “A2DP” stereo music feature, then your music, podcasts, favorite internet radio and other streaming audio can be heard through this headset.
**Use Multipoint one call at a time**

With multipoint and two phones paired, it’s easy to answer calls from either phone.

When already on a call, you will hear a ringtone notification of the incoming call from the second paired phone.

To answer a second call from the other phone, you must end the current call (tap Call button) so new call automatically answers.

If you choose not to answer the second call, it will go to voicemail.

**Listen to the voice alerts (English only)**

This headset automatically announces various status alerts:

- Power On or Off
- Talk-time remaining (in hours)
- Battery Low
- Recharge Headset
- Phone 1 connected
- Phone 2 connected
- Lost connection
- No phone is connected
- Pairing
- Pairing successful
- Pairing incomplete, restart headset
- Volume Maximum
- Redial
- Answer or ignore? (M55 only)
