LEARN MORE

Voyager™ PRO HD
## Bluetooth® Headset

TAKE A GOOD LOOK

CALL BUTTON

- **Take a call or end it** (1 tap). See Learn about Sensors for information about answering without pressing a button.
- **Redial** (2 taps)
- **Initiate phone's voice-dialing** (2-second press until tone heard)
- **Reconnect lost Bluetooth connection** (1 tap)
- **Transfer audio to/from headset** (1-second press while on a call)
- **Dial Plantronics Vocalyst™ voice and text service** (3 taps). You will need to activate Vocalyst service first. See the Vocalyst leaflet for details.

POWER BUTTON

- **On or off** (2-second press)
- **Battery level voice alerts** (1 tap)
- **Activate pairing after initial set up** (press until LED flashes red/blue)

MICRO USB CHARGING PORT

- With AC charger: 90 minutes for full charge
- Fully charge before first use
- Best performance when fully charged
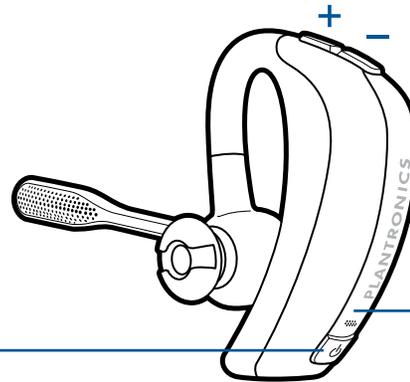

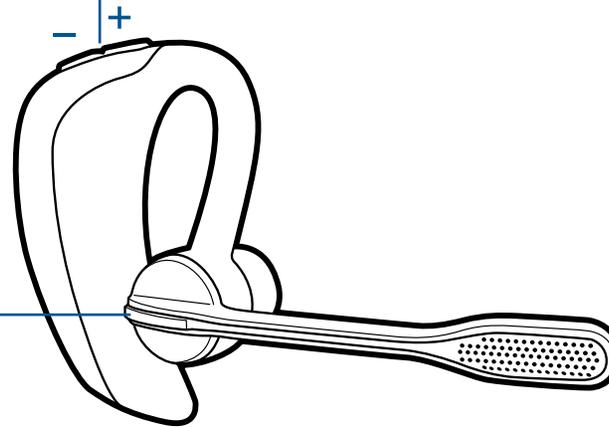

VOLUME/MUTE BUTTONS

- **Volume: up/down** (tap + or – buttons per level change)
- **Mute during a call: on/off** (1-second press of both + and – buttons)
- **Music or audio: pause/play** (1-second press of both + and – buttons). See Learn about Sensors for information about pausing music without pressing a button.

LED

- **Charging** (solid red)
- **Battery status** (1-6 hrs left = 1 red flash, low = 2 red flashes, critically low = 3 red flashes)
- **Pairing mode** (repeating red/blue flashes)

Be safe! Please read the safety guide for important safety, charging, battery and regulatory information before using your new headset.

CUSTOMISE

Make it more personal

Visit plantronics.com/myheadset to update and customise your headset with features like:

- Language options for voice alerts
- Plantronics Vocalyst™ voice and text services (if your region supports it)
- Plantronics apps to improve your hands-free experience
- Disable/enable the sensors
- Disable/enable the A2DP streaming audio feature
- Firmware updates as they release

Available in Android Market

Download the companion app

Our free MyHeadset app gives you tips, tricks and tools for your Android phone. A quick download from the Android phone marketplace gets you going.

- One-tap pairing to your Android
- Record a memo then email it
- Learn about A2DP audio streaming
- Link to Vocalyst™ (if your region supports it)
- Check out product FAQs and user guide

PASSKEY

∗∗∗∗

0000

"**Pairing**" is the set-up process of introducing your headset to your phone. Before using your headset for the first time, you must pair it with your Bluetooth-enabled phone.

"**Multipoint**" lets you pair this headset with two phones so you can answer a call from either phone.

1. READY

First time, right out of the box:

Turn on the headset. The LED flashes red/blue to indicate pairing mode.

Pair new or second phone:

With headset powered off, press and hold the Power button until the LED flashes red/blue.

2. SET

Activate the Bluetooth feature on your phone, then get phone to add/search/discover new Bluetooth devices.

Phones have different menus to select from, for example:

iPhone: Settings > General > Bluetooth > On
(starts the search for devices)

BlackBerry® smartphone: Settings/options > Bluetooth: On > Search for devices

Android™: Settings > Wireless & Networks > Bluetooth: On > Scan for devices
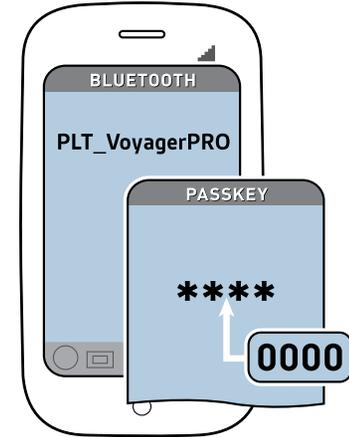

3. CONNECT

Select "PLT_VoyagerPro" from the list of Bluetooth devices shown on your phone.

If phone asks for a passcode, enter four zeros (0000). You may see ∗∗∗∗ on screen.

Some phones also ask to confirm headset connection after pairing.

Headset LED will stop flashing red/blue once your phone and headset are successfully paired/connected.

You can now make a call using your phone's keypad or voice-dialing feature.

4

FIND YOUR FIT
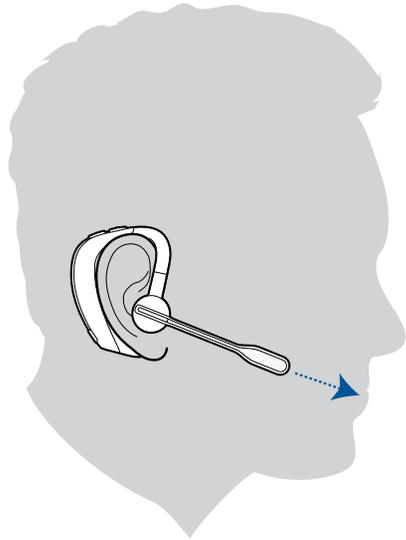

For the best sound clarity, comfort and sensor recognition, make sure you have a secure fit.

2

4

3

The headset comes with the medium eartip installed, but you can replace it with the optional small or large eartip provided.

LEARN ABOUT SENSORS

The Smart Sensor™ technology in this headset recognises if the headset is being worn and can automatically perform time-saving functions.

Automatically answers calls
When you have an incoming call, put on the headset and the call will be answered automatically and you will hear a voice prompt "answering call". You do not have to press the Call button.

Never dials by accident
When you are not wearing your headset the Call button locks to avoid accidental dialing. It unlocks when you put on the headset.

Directs incoming calls
If your headset is not on your ear and there is an incoming call, it will be routed to your phone, which might be easier to find.

When you put the headset on, the call will transfer to the headset and will automatically answer. You will hear a voice prompt "answering call."

If the headset is already on your ear and there is an incoming call, it will be routed to the headset so you need only press the Call button to answer the call.

Knows when to pause audio
If your phone, laptop or tablet PC supports Bluetooth A2DP stereo streaming, you can listen to streaming audio.

If you remove your headset while listening to streaming audio, the sensors will automatically pause the audio until the headset is placed back onto your ear. If you have been streaming audio for less than 10 seconds you will have to manually restart the media player.

MORE ABOUT MULTIPOINT

Plantronics Voyager PRO HD supports multipoint technology, which allows you to use one headset with two different Bluetooth mobile phones.

To pair your headset to a second phone, see <u>Connect to your phone</u>.

How to initiate a call

When two phones are connected, the headset initiates or redials a call from the phone that last made an outgoing call.

To use the second paired phone instead, make the call using the controls on that phone. The second phone activates its link with the headset.

NOTE: The headset cannot place a current call on hold while answering a call from the second phone.

How to answer a call while talking on the other paired phone

To answer a second call on the other phone, the current call must be terminated or transferred back to the first phone. To transfer the call, see <u>Take a good look</u>.

If you choose not to answer, the second call will go to voice mail.

Answering an incoming call from the second phone, while already on another call:

1. To answer the second call, end the first call by tapping the Call button.

2. Answer the "incoming call" by tapping the Call button again.

TIP: To avoid issues with multipoint, use the Call button on the headset rather than your phone controls.

TIPS

Listen to the voice

Your headset automatically announces
various status alerts:
- when you power on/off
- when you run low on talk time
- when a call is being answered by putting
  the headset on your ear
- when Bluetooth connection is lost/
  re-established.

By default the headset provides voice
alerts in US English. To hear the voice
alerts in UK English, German, French or
Spanish, please customise your headset.
See Customise.

Reset the sensors

If your headset is not snug in your ear or it
forgets where it is located, you may need to
reset the sensors.

Connect the headset to the charger and place
the headset on a flat, non-metallic surface for
10 seconds before wearing it again.

SPECIFICATIONS

Talk time	Up to 6 hours
Standby time	Up to 5 days
Operating distance (range)	Up to 10 meters (33 feet), Class II
Headset weight	17 grams
Charge connector	Micro USB cable and AC/DC 100–240V with micro USB connection
Battery type	Rechargeable non-replaceable lithium ion polymer
Charge time (maximum)	90 minutes for full
Power requirements	5V DC – 180mA
Bluetooth version	Bluetooth v3.0
Bluetooth profiles	Supports Advanced Audio Distribution (A2DP), Audio/Video Remote Control (AVRCP), Hands-free v1.5 (HFP), Headset v1.1 (HSP), Secure Simple Pairing (SSP)
Operating temperature	0 - 40°C (32°F - 104°F)
Storage temperature	0 - 40°C (32°F - 104°F)
Charging temperature	0 - 40°C (32°F - 104°F)
