# Offer of Source for Open Source Software

You may have received a Polycom® RealPresence® Access Director™ system from Polycom that contains software from the open source community that must be licensed under the specific license terms applicable to the software.

For at least three years from the date of distribution of the applicable product or software, we will give to anyone who contacts us at the contact information provided below, for a charge of no more than our cost of physically distributing, one of the following items (a) A copy of the complete corresponding machine-readable source code for programs listed in this document or (b) A copy of the corresponding machine-readable source code for the libraries listed in this document, as well as the executable object code of the Polycom work with which the library links.

The software included or distributed for the RealPresence Access Director system, including any software that may be downloaded electronically via the internet or otherwise (the "Software") is licensed, not sold.

## Open Source Software

The RealPresence Access Director system uses several open source software packages, including the CentOS operating system. CentOS is an enterprise-class Linux distribution that contains hundreds of open-source components. For more information about CentOS, visit <http://www.centos.org/>.

The packages containing the source code and the licenses for all of the open-source software, including CentOS and its components, are available upon request.

## Contact information for requesting source code

## License Information

The following table contains license information for the open source software packages used in the RealPresence Access Director system. Note that the source code and the licenses for all the open-source software, including CentOS and its components, are available upon request. This list is provided as a convenient reference.

### CentOS

A subset of CentOS is included. The CentOS distribution is licensed under the GNU General Public License v2.0 (GPL v2), which is provided below. Individual packages in the distribution come with their own licenses. The CentOS RPMs and SRPMs can be found at <http://mirror.centos.org/> and at <http://vault.centos.org/>.
