## TECHNOLOGY LEGEND

### Active Noise Canceling (ANC)

Technology that reverses surrounding sound waves to cancel low-frequency noise in order to isolate and minimize ambient noise the user can hear.

### Close Conversation Limiting

Technology that optimizes your voice, while minimizing nearby background noise.

### Hi-Fi Stereo

Full-range, dual-channel audio playback capable of frequencies from 20 to more than 20,000 Hz.

### Microsoft Teams Certified

For devices to be certified, they need to meet Microsoft's audio requirements to ensure users get the best audio experience, they also must include a dedicated Teams button to instantly bring to the foreground Microsoft Teams for streamlined communications.

### Narrowband

Frequency range of 300 Hz to 3.4 KHz found within PSTN and mobile voice networks.

### SoundGuard DIGITAL

All the benefits of SoundGuard plus anti-startle protection, which detects and eliminates sudden increases in sound, and time-weighted average (TWA) control, which prevents average daily sound exposure from exceeding 85 dBA.

### Wideband

Frequency range up to 6,800 Hz. Meets TIA-920 standard for genuine wideband response.
