POLY LENS

Make collaboration better for your employees, no matter where they work or the Poly device they choose. Poly Lens gives you better visibility into modern workspaces across the entire organization. Getting started is simple. IT professionals can remotely inventory, monitor, and troubleshoot Poly devices from a single pane of glass. Common tasks such as applying bulk software and policies are streamlined to allow you to do more with your day.

An important part of any investment is knowing how it's performing. Poly Lens gives you a window into collaboration environments across your entire organization, with a spotlight on how devices are being used. The insights dashboard intelligently elevates the most important information to the top of the page for a quick review or deeper research.

Accessed from anywhere, Poly Lens is powered through a robust cloud service delivering flexibility, and security, adding value without heavy IT lifting. No need to buy servers means more bang for your budget. Everything you need to make the most of your workspace is right at your fingertips.

- Leverage simple device onboarding one or many devices within minutes.
- Manage voice, video, and headsets within a single interface.
- Use intelligent newsfeeds to monitor connection status and device health.
- Take a proactive stance with device alerting delivered with premium software enabled with Poly+.
- Do more, in less time with bulk provisioning policies.
- Simple user app for device personalization while in the office, remote, or mobile.
