

## BETTER COLLABORATION. FEWER HEADACHES.

### **BENEFITS**

- A turnkey solution that drives interoperability of Microsoft Teams via an end-to-end, global, single-source managed service
- Ensures proactive management and monitoring, including SIP and PSTN voice sessions, performance and capacity management with Office 365 monitoring
- Gives you the flexibility of purchasing to fit your financial model and invest in the devices that are right for your business
- Includes setup and configuration of the total solution

### **MIGRATING TO MICROSOFT TEAMS?**

With Managed Services for Microsoft Teams, you get a single provider that delivers everything you need. Management of the cloud. Your endpoint devices. Agility for your entire enterprise. And we know driving adoption fast is a high priority. That's why we train your end users based on their needs. We've got Microsoft Teams support fully covered so your IT is freed up to focus on mission critical priorities. Don't worry about warranties or replacing hardware. That's what our technical support team is for. You can rely on the engineers that built the devices. Reach them 24x7x365.

- 24x7x365 operation and proactive management and support
- Expedites PBX/Skype for Business migration to Microsoft Teams
- Flexible training based on workers, culture and environment
- Provides ear-to-ear monitoring of your Microsoft Teams environment
