

SECURE, PRIVATE MEETING ROOMS

BENEFITS

- Rely on the convenience of browser-based endpoint connection, supported by a browser plug-in.
- Reprioritize your key IT resources by maximizing design and setup time with repeatable standard design functionality.
- Maintain access to a variety of Poly resources while consulting your dedicated Business Relationship Manager (BRM).
- Make the most of ongoing video conference capability through a secure, private environment.

POLY PRIVATE CLOUD FOR BUSINESS EXPRESS MANAGED SERVICE

Are you an IT Director seeking always-on, secure Unified Communications and Collaboration (UC&C) facilities that can support a maximum of 100 participants? Is it essential to manage multi-point video conferencing in a cost-effective manner?

If these are top-of-mind concerns, then **Poly Private Cloud for Business Express Managed Service** is your answer. With this service, you'll have virtual meeting rooms for meetings between employers, vendors, or clients, that are easily accessible and secure* via the public internet.

Hosted at a Poly-provided data center in North America, the service brings you high-scale, high-definition B2B video collaboration at a sharp resolution of up to of 720p30. It ensures a secure path for supported, standards-based internet-enabled video endpoints – with the ability to connect up to 100 participants in a single meeting. It also allows you the ability to burst over the purchased concurrent users on a monthly basis, sends monthly usage summary reports when using a Poly Resource Manager solution, and offers an around-the-clock technical support team.

KEY CAPABILITIES:

- Video conference capability for up to 100 participants in a secure, private environment using dedicated resources
- Event, incident, problem, change, configuration, and capacity management
- Define and control budget
- No asset management required
- Optional, additional, and fee-paying capabilities including Polycom One Touch Dial, device management audio-only use support, and telepresence support

Poly Private Cloud for Business Express is currently only available in North America.
