

## **HOSTED SOLUTIONS TO MEET YOUR NEEDS**

### **BENEFITS**

- Rely on hosting out of your own data center while delivered by the Poly Customer Management Center
- Take advantage of One Touch Dial calendar integration, Microsoft integration, browser-based connectivity, and 24x7 service desk support
- Depend on industry-best-practices for connecting your protected infrastructure solution through a firewall traversal solution
- Use the Network Readiness Workshop to evaluate your network ahead of carrying real-time media workloads

### **POLY PRIVATE HYBRID MANAGED SERVICE**

Do you value the flexibility of gradual migration in phasing workloads over time? How about the incomparable comfort your IT staff feels when operating on-site? What about the chance to assess what IT's role would look like in an all-cloud deployment while still being able to revert to a premise-based model if need be? If this is important to you, then **Poly Private Hybrid Managed Service** is your ideal solution.

Backed by a secure path for supported, standards-based, internet-enabled video endpoints to connect with end users, Poly uses industry-best services for connecting the protected infrastructure solution through a firewall traversal solution. This cost-effective approach provides the ability to request an increase in the concurrent connections usage capacity (CU) and a bursting capacity of 25% on the increased CU.

#### **THE SERVICE INCLUDES:**

- Always-on, cost-effective wide-scale, and multi-point video conferencing
- Up to 180 participants in a single conference
- Call processing and video bridging resources
- Advanced dial-plan management to support external connectivity

The service requires all necessary connectivity and access to communicate with the components via a LAN/WAN infrastructure.
