

ACCELERATED ADOPTION. HAPPIER HEADSET USERS.

BENEFITS

- Make headset rollouts smoother for everyone—from your help desk team to end users
- Free up your IT staff by having embedded Poly experts troubleshoot any issues end users have on your deployment day
- Give end users personalized help with a high-touch onsite expert who can load firmware, help with headset set up and operation, answer questions and troubleshoot headset queries

HIGH-TOUCH ONSITE SUPPORT FOR HEADSET SERVICES

Everyone deserves a smooth headset introduction. Make life easier for both your IT team and your end users with the High-Touch Onsite Support for Headsets Service. Our audio specialists are happy to lend a hand with customizing headsets to meet the unique needs of your workers—from adjusting the position on a mic to sharing best practices for better meetings. We'll also walk the floor to answer questions and test equipment on the spot. All to help your teams accelerate headset adoption and increase productivity. Now that's high-touch service.

- Get headsets and software all connected and set up
- Increase end user headset satisfaction and productivity
- Expert onsite help for end users and IT staff on day one
- Faster, smoother headset adoption
