## What's New

The EagleEye Director II camera version 2.0 provides the following new features:

- EagleEye Director II App
- Web Interface (requires Internet Explorer 11 and Google Chrome version 65 and higher)
- Cascading for two cameras
- Group Series, Bring Your Own Device, and Automatic connection modes
- Configurable position of the PIP window

Japan customers: Version 2.0 enables Bluetooth® and allows the camera to use Wi-Fi. If your camera shipped before May 2018 and you update its software to version 2.0 or later, you need to add a new Technical Conformity Mark product label to the camera to indicate it complies with the Japan Radio Law. (Note that future Polycom® RealPresence® Group Series system software may bundle EagleEye Director II camera version 2.0 or later.) You do not have to replace the label if you plan to continue using a version earlier than 2.0. Contact Polycom Japan to obtain the new product label.

## Security Updates

For information about known and resolved security vulnerabilities, refer to the [Polycom Security Center](#).

## Install

For installation information, refer to the *Polycom EagleEye Director II Administrator Guide*.

## Software Updates

Software update scenarios can involve two cascaded EagleEye Director II cameras, a primary camera and a secondary camera, that have different software version numbers. The following table lists the resulting software versions of the cameras after a software update.

Upload Version	Current Version		Update Result/Workaround
	Primary	Secondary	
2.0	2.0	2.0 + 1	No Update
2.0 + 1	2.0	2.0 + 1	Primary and secondary cameras are 2.0+1
2.0 + 1	2.0 + 1	2.0	Disconnect cascaded cameras; update the secondary camera without the primary camera
2.0 + 1	2.0	2.0 - 1	Primary and secondary cameras are 2.0+1

## Hardware and Software Requirements

To use an EagleEye Director II as a USB camera, and to use Microsoft Surface Hub for Skype for Business and Microsoft Lync, the following minimum requirements must be met.

Category	Requirement
