## Ports

The following tables list the inbound ports that are supported in this release of Polycom Companion.

### Inbound Ports

<i>Usage Type</i>	<i>Protocol</i>	<i>Port</i>	<i>Function</i>
https	TCP	443	HTTPS access

## System Constraints and Limitations

Polycom Companion cannot upgrade the Polycom EagleEye Mini when the camera is in use by another program. Close all programs using the camera before upgrading your device.

For Windows devices, if attempting to upgrade the EagleEye Mini when CPU or Memory usage is high, the update may be unsuccessful after 25 seconds. If encountering an error message, close some programs to reduce CPU or Memory consumption, and unplug the EagleEye Mini and attempt the update again.

If your PC goes to hibernate or sleep when Polycom Companion is upgrading the EagleEye Mini, you can replug the EagleEye Mini and update it again after the PC wakes up from hibernate or sleep.

## Known Issues

The following table lists known issues in all releases of Polycom Companion.

These release notes do not provide a complete listing of all known issues that are included in the software. Issues not expected to significantly impact customers with standard voice and video conferencing environments may not be included. In addition, the information in these release notes is provided as-is at the time of release and is subject to change without notice.
