

Polycom® RealPresence Touch™ with Skype™ for Business Quick Tips

3725-84235-002A | February 2017

Get Started

The Polycom® RealPresence Touch™ device in Skype mode enables you to use Polycom® RealPresence Group® and Polycom® RealPresence Centro™ systems in a Microsoft® Office 365™ environment.

You can use Skype mode with a system registered to Office 365 and paired with a RealPresence Touch device. In Skype mode, you can only control the system with the touch device. The remote control and the touch screen are disabled.

Your administrator powers on, configures, and pairs the RealPresence Touch device. For help with the touch device, contact your administrator.

Skype Mode Home Screen

Depending on how your administrator has configured your system, the Home screen of your RealPresence Touch device displays in one of two ways:

- The regular interface displays the  Place a Call icon.
- The Microsoft Skype for Business mode interface displays a  New Meeting icon.

The following icons display on the home screen in Skype mode.

Home Screen Icons

Icon	Description
	Dial Pad
