### Release History

Release	Release Date	Features
6.0.1	November 2016	Resolved some known issues.
6.0.0	September 2016	This release included the following features: <ul style="list-style-type: none"><li>• Automatic Wake Up with Motion Sensors</li><li>• Audio-only Calls</li><li>• Office 365 Hybrid Deployment</li><li>• Generate DTMF Tones with RealPresence Touch</li><li>• Enhanced Quality of Experience</li><li>• Log Upload to Skype for Business Server</li><li>• Simplified and Persistent Video Layouts</li><li>• Polycom® RealPresence® Cloud service support</li></ul>
5.1.2	June 2016	Resolved some known issues.

**Release History**

Release	Release Date	Features
5.1.1	April 2016	Resolved some known issues.
5.1.0	February 2016	Initial release of the RealPresence Centro system, which included support for the following features: <ul style="list-style-type: none"> <li>• Touch User Interface Control</li> <li>• Active Speaker Detection</li> <li>• VisualBoard application</li> <li>• SmartPairing Control and Content Sharing</li> </ul>

## Products Tested with this Release

The following table lists products that were tested with the RealPresence Centro. The following list is not a complete inventory of compatible equipment. It simply indicates the products that have been tested for compatibility with this release.

**Note: Update your Polycom devices**

Polycom recommends that you upgrade your Polycom devices with the latest software versions, as compatibility issues may already have been addressed by software updates. Refer to the [Current Polycom Interoperability Matrix](#) to match Polycom devices with the latest software release.

**Products Tested with this Release**

Product	Tested Versions
Polycom Distributed Media Application™ (DMA®)	6.3.2.2
Polycom RealPresence® Resource Manager	10.0.0
Polycom® Immersive Telepresence (ITP) Series	3.1.4

Polycom® SoundStructure®	1.7.2

**Supported Web Browsers**

The RealPresence Centro administrator web interface is supported in the following web browsers:

- Windows® Internet Explorer 10 or 11 on Windows 8
- Apple® Safari® 9.0.3 on Mac OS® X (Yosemite)
- Mozilla Firefox 44 on Windows 8

**Integrating with the Polycom RealPresence Touch**

To integrate a Polycom RealPresence Touch with a RealPresence Centro system, the touch panel and system must have compatible software versions.

After pairing with the RealPresence Centro system, the RealPresence Touch verifies the compatibility of the RealPresence Touch panel software and requests a software update. Polycom recommends that you update the software on RealPresence Touch to match the RealPresence Centro system software.

You can update The RealPresence Touch operating system software through the administration pages on the RealPresence Touch or through the RealPresence Touch web interface.

**Limitations**

The following sections include limitations with the RealPresence Centro.

**Color and White Balance**

Under certain conditions, the 360 camera does not properly color and white balance due to one camera being saturated while another is not saturated (GS-32398). You can use some of the following workarounds to correct the issue:

- Block the window or source of light that is causing one camera to saturate.
- Rotate the system so that the source of saturation is across the stitch boundary.
- Add something colorful near the stitch boundary.

# Security Updates

Refer to the [Polycom Security Center](#) for information about known and resolved security vulnerabilities.

## Known Issues

The following table lists all known issues and suggested workarounds in version 6.0.1 for RealPresence Centro.

### Known Issues

Category	Issue Number	Release	Description	Workaround
Audio	GS-29904	5.1.1	You cannot route the RealPresence Centro microphones to SoundStructure to send audio from the system to the far-end. Only external microphones connected to SoundStructure can send audio to the far-end.	
Content	GS-26662	5.1.0	During a conference with RealPresence Centro and RealPresence Mobile, content sent from People + Content IP freezes when content is sent from RealPresence Mobile.	Click the Play icon in the People + Content application.
Directory	GS-27414	5.1.0	When searching for a contact in the Global Directory, contacts with special characters in their names do not display in the search results.	
Documentation		6.0.0	In the Polycom RealPresence Centro Administrator Guide, the Skype for Business Interoperability and Advanced Video 1080p options are listed as options available for purchase, which is incorrect. These are included options in the RealPresence Centro system. The only option available for purchase is Multipoint Video Conferencing.	
Hardware	GS-27622	5.1.0	When the RealPresence Centro system reboots, there is a 15-20 second delay between when the Home screen displays on the monitors and when the camera is on.	
Security	GS-27301	5.1.0	When using the onscreen keyboard to enter a password, the key presses display on all the monitors.	

**Known Issues**

Category	Issue Number	Release	Description	Workaround
User Interface	GS-27175	5.1.0	After RealPresence Centro reboots, the IP address displays as 0.0.0.0.	Navigate to another screen, then return to the Home screen.
Video	GS-32398	6.0.0	Under certain conditions, the 360 camera does not properly balance colors and white due to one camera being saturated while another is not saturated.	<ul style="list-style-type: none"> <li>Block the window or source of light that is causing one camera to saturate.</li> <li>Rotate the system so that the source of saturation is across the stitch boundary.</li> <li>Add something colorful near the stitch boundary.</li> </ul>

## ***Other Known Issues***

### **Microsoft Office 365**

When migrating an Office 365 on-premises account to online, the system's local or web interface may indicate that it is registered when the process has not yet completed on the server end. If a system is not able to make a call after migration, wait a few minutes and try again. The migration process can take 30 minutes or more to complete.

Prior to registering an Office 365 account with a RealPresence Centro system that is set to auto configuration, you must make sure the server and proxy addresses have been cleared. If you have entered specific server addresses into the address fields Registrar server and Proxy server at **Admin Settings > Network > IP Network > SIP**, before you change the SIP Server Configuration setting from **Specify** to **Auto**, you must clear the address fields and then click Save. If the server fields are not cleared, SIP registration might fail.

### **Wireless Mice**

Wireless mice that are connected to RealPresence Group systems may not function properly with the VisualBoard application and are not recommended.

## **Get Help**
