What's New in 8.0.2D

Poly frequently provides software updates with new features and recommends that you regularly update the software on your phones for the best performance and experience.

Poly Lens Connection Fix

This release contains a fix to ensure a more stable connection between your system and Poly Lens.

Released in 8.0.2

This release of PVOS includes all the features and important fixes from previous software releases, as well as the following new features:

- [Improved Line View Access on CCX Series Phones](#)
- [Disable the Use of USB Mass Storage Devices](#)
- [Zoom Phone Appliance - LLDP Support for Chassis and Port Subtype](#)

Improved Line View Access on CCX Series Phones

For CCX users who prefer to use speed dial, BLF keys, or other line keys to make outbound calls rather than using the dialpad, previously the off-hook line view setting provided this capability. In this release, a new option is available to further customize immediate access to phone lines, speed dials, macros, and BLF keys when performing call actions such as transfers or conferences.

- `up.OffHookLineView.enabled` (default 0)
- `up.OffHookLineView.inCallActions.enabled` (default 0)

You can further customize which view is your **Home** screen by going to **Settings > Basic > Preferences > Home Page** or by configuring `feature.preferredHomeScreen`.

Applies to products:

- CCX Series

Disable the Use of USB Mass Storage Devices

You can configure USB ports to block USB mass storage devices while continuing to permit connecting and using USB peripherals such as headsets. When USB storage devices are blocked, picture frame, call recording, and USB provisioning features are unavailable.

Configuration:

- `feature.usb.host.massStorage` (default 1)

Permitted values: 0 or 1

Applies to products:

- Edge E Series
- Trio 8300

Zoom Phone Appliance - LLDP Support for Chassis and Port Subtype

Using LLDP, CCX phones can now read the connected wireless AP or switch's chassis and port subtype and share the values with the Zoom Phone Appliance application.

For more information, see [Zoom Support – Nomadic Emergency Services](#)

Applies to products:

- CCX Series

Zoom Rooms Controller

Poly Trio C60 phones optimized for Zoom Rooms act as a controller via the system's touch user interface and provide audio for Zoom Room meetings through the built-in speakers and microphones.

This software release contains the Zoom Rooms Controller version 5.12 (1540) as embedded software. For more information on this Zoom release, see the [Zoom Help Center](#).

For the latest setup instructions, see the *Integrating Poly Trio Systems with Zoom Rooms Solution Guide* at [Poly Solutions for Zoom Environments](#).

Microsoft Teams

The Microsoft Teams application is included in each PVOS release for use on CCX 400, CCX 500, CCX 505, CCX 600, and Trio C60 phones. The Teams version included may be updated independently of the PVOS version using the Teams Admin Center. For more information on this Teams version, see [What's new in Microsoft Teams](#).

Important: PVOS includes the Microsoft Teams base profile in every release; however, Microsoft support of a release depends on the PVOS version delivered by Microsoft through the Teams Admin Center.

Microsoft Teams Component Versions

Microsoft Component	Version
Microsoft Teams	1449/1.0.94.2022110803
Microsoft Admin Agent	1.0.0. 202209060820.product (v382)
Microsoft Intune Company Portal	5.0.5484.0

Release History

This following table shows the release history of the PVOS.

Version History

Release	Release Date	Features
8.0.2	February 2023	Maintenance release for Poly Voice Software. Includes the following features: <ul style="list-style-type: none">• Improved Device SCEP Certification• LCD Fix on CCX 350• Lens Connector Update• Dual Tone Fix• Improved Line View Access on CCX Series Phones• Disable the Use of USB Mass Storage Devices• Zoom Phone Appliance - LLDP Support for Chassis and Port Subtype• Zoom Rooms Controller version update• Microsoft Teams version update
8.0.1	October 2022	Maintenance release for Poly Voice Software. Includes the following features: <ul style="list-style-type: none">• Poly Fast Pair• ICE, STUN, and TURN support• Accessibility Enhancements for Vision Disabilities• Network Subnet Enhancements• QR Code Enhancements• Zoom Rooms Controller version update• Microsoft Teams version update

Includes the following features: <ul style="list-style-type: none">• Improved Line Key Assignments• Contact Support Menu• License File Import from the System Web Interface• System Web Interface Security Enhancements• Minimized Reboot Parameters for Hotdesking• Persistent Redial Button• Web Proxy Improvements• Zoom Phone Base Profile on CCX 400 and CCX 500• Zoom Warm Transfer• Microsoft Teams Version Update• Introducing the Poly Edge E Series business IP phones

Security Updates

Refer to the [Poly Security Center](#) for information about known and resolved security vulnerabilities.

Resolved Issues

The following table lists resolved issues in this release.

Note: These release notes do not provide a complete listing of all resolved issues that are included in the software. User experience updates, performance fixes, and enhancements may not be included. In addition, the information in these release notes is provided as-is at the time of release and is subject to change without notice.

Resolved Issues

Category	Issue ID	Product	Description
Certificate Management	VOICE-74100	CCX Series	CCX phones fail to process certificates provided by SCEP systems such as Sectigo SCM, Cisco ISE, Microsoft NDES or EJBCA.
Hardware	VOICE-73905	CCX 350	The LCD of some CCX 350 phones flickers.
Lens	VOICE-73741	CCX, Edge E Series, Trio	Lens frequently reports the phone as offline when it is powered on and otherwise working as expected.
Peripherals	VOICE-73434	CCX Series	Dial and Ring back tones may be heard simultaneously with a CCX in Teams mode and connected to a PC over USB.

Known Issues

The following table lists known issues and suggested workarounds included in this release for PVOS systems.

Note: These release notes do not provide a complete listing of all known issues that are included in the software. Issues not expected to significantly impact customers with standard voice and video conferencing environments may not be included. In addition, the information in these release notes is provided as-is at the time of release and is subject to change without notice.

Microsoft controls the software experience and performance of PVOS systems configured for Microsoft Teams. For any issues regarding Microsoft Teams on your PVOS system, visit the [Microsoft Teams User Feedback Forum](#).

Known Issues

Category	Issue ID	Product	Description	Workaround
Bluetooth	VOICE-73114	Trio C60	Streaming non-call audio, such as music, via Bluetooth from a mobile phone generates a Back to Call notification bar on the phone's UI.	No workaround.
Diagnostics	VOICE-72468	Edge E Series	Quickly pressing the Back soft key to cancel the Run Diagnostics Check in the Help and Support menu can cause the phone to restart.	No workaround.
Diagnostics	VOICE-72830	Edge E Series	Diagnostic features such as log collection, pcaps, and configuration information initiated from PDMS-SP to Edge E phones fail after several hours of uptime because the cloud connection disconnects and does not reconnect on its own.	Restart the phone.
Logs	VOICE-69503	CCX Series Trio C60	Accessing the trace route diagnostic tool from the Settings > Diagnostics > Network menu doesn't return any results.	No workaround.
Software	VOICE-73179	CCX 600 CCX 700	The Submit and View buttons are partially overlapped when using the corporate directory (LDAP).	No workaround.
User Interface	VOICE-72852	Trio 8300	The Trio 8300 displays overlapped text in the top-left corner of the Call History screen.	No workaround.

Category	Issue ID	Product	Description	Workaround
User Interface	VOICE-73086	CCX Series	When in the Generic base profile, a locked CCX phone that receives a voicemail causes status bar icons to overlap with other icons.	No workaround.
User Interface	VOICE-73209	Edge E Series	When viewing call histories on Edge E phones, applying a filter to view a single line's history is not applied correctly and causes results for all lines to appear.	No workaround.
User Interface	VOICE-73213	CCX Series	When viewing call histories on CCX phones, applying a filter to view a single line's history is not applied correctly and causes results for all lines to appear.	No workaround.
User Interface	VOICE-73358	Trio C60	Trio C60 phones configured for the phone lock feature in the Generic base profile incorrectly show the Unlock option in the main menu after the phone has been unlocked using the idle screen's Unlock button.	No workaround.
User Interface	VOICE-73367	Edge E Series	Edge E phones incorrectly set the Greyscale color correction mode instead of the default Deuteranomaly (Green-Red) color correction mode when color correction is enabled using a configuration file and when no color correction mode is specified.	Use the Accessibility menu to change the color correction mode.
