

Using Quick Setup

Technical Notification 45460

This engineering advisory applies to the following Polycom phones:

- Polycom® VVX business media phones
- Polycom® SoundPoint® IP phones
- Polycom® SoundStation® conference phones
- Polycom® RealPresence Trio™ conference phones

A Quick Setup feature is available to simplify the process of entering the provisioning (boot) server parameters from your phone's user interface. This feature is designed to make it easier for on-site, "out of the box" provisioning by allowing direct access to edit provisioning server information without the need to traverse deeper menus and enter passwords that normally restrict access to these options.

When enabled, this feature presents a **QSetup** soft key to the user on the idle screen. When the user presses the **QSetup** soft key, a new menu immediately displays that allows them to configure parameters the phone uses to access the provisioning server.

This feature can be used as a form of user login when unique passwords are employed per user.

Quick Setup Parameters

The following parameters enable the Quick Setup feature.

Quick Setup Parameters

<i>Parameter</i>	<i>Description</i>
<code>prov.quickSetup.enabled</code>	0 (default) - The QSetup soft key is not available and provisioning server parameters are available only on the Administrative settings on the phone. 1 - Enable the QSetup soft key.
<code>prov.quickSetup.limitServerDetails</code>	0 (default) - All provisioning server settings are available when you access the QSetup Menu. 1 - Hide all provisioning server settings from the QSetup menu except for the username and password fields.

Enable Quick Setup from the Phone Menu

You can enable Quick Setup from the phone.

- 1 Press the **Menu** key, and then select **Settings > Advanced > Admin Settings > Network Configuration**.

- 2 When prompted, enter the administrative password. The default is 456.
- 3 Using the arrow keys or touch controls, scroll to select **Quick Setup**
- 4 Select **Enabled**.
- 5 Press the back button until prompted to save.
- 6 Press the **Menu** key to return to the idle display.

The **QSetup** soft key displays. The location of the QSetup soft key depends on which features are enabled and whether your phone is currently registered. This feature is normally used when the phone is unregistered, but it can be used at other times.

Quick Setup Example

The following diagrams illustrate the Quick Setup feature.

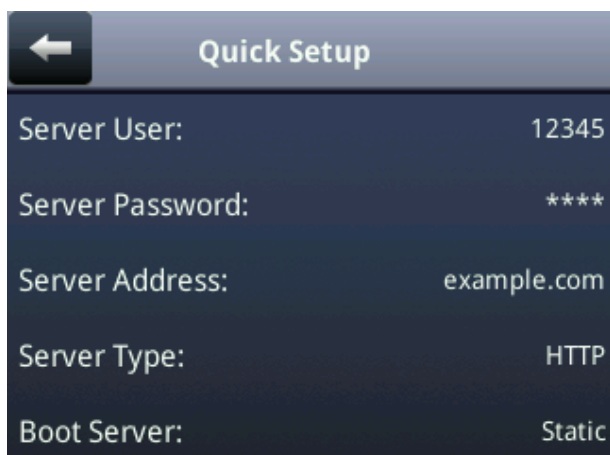

When Quick Setup is enabled, the QSetup soft key displays on the screen.

You can remove other buttons from the phone to leave a clear action visible to users.

```
<POLYCOM
prov.quickSetup.enabled="1"
softkey.feature.newcall="0"
softkey.feature.directories="0"
softkey.feature.forward="0"
softkey.feature.doNotDisturb="0"
/>
```

The QSetup menu when displaying all setup options.

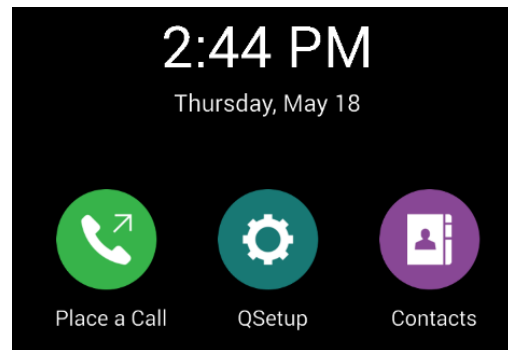

The QSetup menu with `prov.quickSetup.limitServerDetails` set to 1

The QSetup soft key is named "QStp" on phones with limited screen space such as the VVX 101 and 201.

The QSetup icon on the RealPresence Trio 8800 phone.
