A REMOTE CONTROL FOR THE SECURITY-CENTRIC ORGANIZATION

BENEFITS
- Invaluable IR remote control and receiver for organizations that prohibit radio frequency (RF) technology like Bluetooth® and WiFi.
- No-hassle operation: Easy to use and simple to set up.
- Get up and running instantly with intuitive and familiar controls.
- Works seamlessly with your Poly equipment: Compatible with Poly G7500 and the Poly Studio X Family of video devices.

POLY IR REMOTE CONTROL AND RECEIVER
Great news for organizations that don’t allow radio frequency (RF) technology: The Poly IR Remote Control and Receiver offers a powerful, intuitive way to control your video calls without relying on Bluetooth® or WiFi. There’s no need for device pairing or additional network infrastructure, making this a hassle-free and cost-effective option. Set up is shockingly easy. Simply plug in the IR receiver via USB to any Poly G7500 or any of the Poly Studio X family of video devices. Almost instantly, you’re managing your video calls with the touch of a button. A simple, secure and affordable way to manage video calls with confidence.

- Intuitive and familiar controls.
- A breeze to set up and use.
- Compatible with Poly G7500 and Poly Studio X Family.
POLY IR REMOTE CONTROL AND RECEIVER
