Global events, accessibility, and inclusivity has changed how and where we communicate and collaborate. These realities have greatly accelerated organizational needs to adapt to more flexible workplaces and workstyles.

IT must enable multiple ways for end users to easily and securely connect from wherever they may be – in the home office, main campus, or while traveling. This presents IT with new challenges supporting a wide variety of technical and non-technical users across various network types, sizes, and quality.

At the same time, hyper-competition requires teams from around the world to come together and work more efficiently, improve business processes, and ultimately make the right decisions faster. Simply put, organizations must find more effective ways to work together to succeed in our fast-paced world.

Whether you want to improve communications, increase productivity, build better teams, or enhance your corporate culture, Poly Clariti lets you own the conversation with a simple, powerful, and flexible solution. Poly Clariti connects people with video, voice, and content, bridging locations across any distance, device, or timeline.

Consider for a moment, if everyone had access to consistent, feature-rich collaboration technologies—in purpose-built endpoints or personal devices. Now, what if you could make that possible with easy licensing that scales, with your needs for a private, all-in-one solution.

What if you had the choice of deployment—your own hardware, private cloud, virtual machines, or a mix? What if you could integrate these collaboration benefits into your business processes and ecosystem to truly make it easy for everyone to use? Poly Clariti collaboration software makes all of this possible so you can unlock greater opportunities and achieve better valuable results.

Finally, what if your organization simply does not have the in-house experts or desire to plan and design deploy, optimize manage, or monitor their collaboration platform? Poly has a wide range of Managed and Professional Services delivered following a proven methodology, leveraging best practices by the Poly global team of creditable and credentialled experts and customer success advocates. For customers that may only need to refresh their existing infrastructure investment, Poly Professional Services has all the expertise needed to execute with speed and precision. Still, you may require a white glove solution that can be delivered best by Poly. Our Managed Services reduce the burden on your internal teams while keeping your collaboration solutions cost-effective and reliable.

CONNECT WHEREVER, WHENEVER YOU NEED.
THE POLY DIFFERENCE

POWERFUL VIDEO COLLABORATION SOFTWARE
Poly Clariti includes everything an organization needs to deploy, manage, and monitor complete end-to-end video, voice, and content collaboration in a private software instance. Along with a simple web-based app that seamlessly connects to room-based systems of any size, and unmatched interoperability that ensures everyone has a better video conferencing experience without worrying about the technology.

FLEXIBLE DEPLOYMENT
You choose how to deploy Poly Clariti—on-premises, in a private cloud or through a Poly-managed service. Poly Clariti licensing is based on the number of concurrent users. By deciding how many people need to communicate at the same time, you enable your entire organization with collaboration tools on any device—with the flexibility to add more licenses at any time. For those organizations that may need "Special Event" support, Poly Managed Services can provide custom 'bursting' options. Choose from either a subscription or perpetual licensing model that best fits your needs. Streamlined remote or onsite installation through a step-by-step wizard gets even the most complex setup up and running in a matter of hours – not days. With unbelievable scale, redundancy, and high reliability you’ll never run out of ways to connect.

CENTRALIZED MANAGEMENT
Poly Clariti helps customers effectively plan, manage, and monitor the video network to assure mission critical delivery. Vital to any-sized deployment is device inventory visibility and software control to ensure consistent and reliable uptime. Poly Clariti delivers the necessary tools to ensure collaboration continues to run smoothly and effectively in your organization.

SUPERIOR MEETING EXPERIENCE
Users maintain the familiar workflow of scheduling meetings with their regular calendar and active directories to invite colleagues. Poly Clariti Workflow Lite add-in for Microsoft Outlook provides a simple click-to-call environment where people can quickly video conference with each other on-demand without losing critical time in meeting setup and calendar alignment.

BROADEST INTEGRATION AND INTEROPERABILITY
Poly Clariti offers industry leading Microsoft Teams integration with RealConnect, a Microsoft certified video interoperability solution that allows standards-based room devices from Poly, Cisco, Logitech, and others to seamlessly join a Microsoft Teams meeting.

B2B AND B2C COLLABORATION
Video conferencing and content sharing isn't limited to just your organization. Poly Clariti lets you collaborate with partners, customers, vendors and virtually anyone outside of your organization. With built-in and secure firewall traversal, Poly Clariti makes joining meetings as simple as click-to-call for all your guests from virtually any device and anywhere.

ADVANCED OPTIONS
Connect other applications from Google calendaring services to CRM applications like Salesforce through open APIs to customize and build the solution that works best with your organization's workflow. Optional upgrades for advanced analytics, recording and streaming, and remote management extend the solution with even more power.

POLY GLOBAL SERVICES
Poly’s number one priority is ensuring our customers’ success in achieving business outcomes by providing the expertise needed to realize the full potential of their investment in collaboration solutions. From planning and design, deployment and integration to supporting, operating, and optimizing collaboration solutions within the Unified Communications environment, Poly delivers Professional Services that assist you throughout your collaboration journey.

Solution design and readiness services ensure you get the collaboration solution that’s right for your unique organizational requirements and goals. Implementation services speed the time to solution readiness, and integration services ensure the solution works seamlessly within your existing UC and business applications environment. Poly helps you meet a variety of business challenges with a comprehensive portfolio of Support Services designed to meet your exact needs. Each business environment is unique, which is why our flexible support service options provide the right level of assistance and technical expertise, when and where you need it, to keep your end users productive and satisfied. Your success in driving business outcomes is our ultimate goal.
