Electronic Hook Switch Guide
Electronic Hook Switch Guide

Electronic Hook Switch Cables (EHS) provide remote desk phone call control (answer/end) with your Plantronics wireless headset system (or the MDA200 headset hub).

We offer cables that are compatible with many of the most popular office desk phones.

We also have a handset lifter accessory that can be used with most desk phones that are not compatible with one of our EHS cables. Visit plantronics.com for more information.

  - Wireless Bluetooth headset system manages desk phone and mobile calls

**EHS Setup**
Use the EHS setup below to automatically answer a desk phone call by pressing a button on your Savi 700 Series or CS500 Series headset or MDA200 or Voyager Legend CS.

**NEC MODELS:** DT 330/430, DT 730, DT 750, DT830/830G

**SETUP**

*The NEC DT Series phones come in 2 versions, the std SIP (used with NEC product SIP@NET and 3C) and the i-SIP/N-SIP versions which are used with the SVB100, SVB300 and SVB500. The APN-91 only works with the i-SIP/N-SIP versions of the DT700 terminals.*

**CONFIGURATION**

- **Savi 700**
  - Cable A
  - Flap
- **CS500/CS500 XD, Voyager Legend CS**
  - Install the ringer detect device on the phone over the speaker, under the handset. This is then plugged into the socket mounted midway along the audio cable. Supports only DT700/300 Series. Please contact NEC for more information.
- **MDA200**
  - 3 A 2

*Note: Disconnect the phone from the network cable prior to installing the EHS cable. Insert cable “A” per diagram, and install the plastic flap included with the APN-91 cable, per the diagram prior to reconnecting the network connection. Please wait 20-30 seconds after all connections are made before pressing the headset button to make a call. Please contact NEC for more information.*

For phone set-up, please refer to your specific phone manufacturer’s instructions.
